**Subject:** Commission to Study the Adjudication of Water Law Cases Homework

Micheline:

I no longer have Jamie Gradick's email since I retried. Can you please share this with her?

My recommendation of training areas for judges on a specialized water docket are:

Basics of Hydrology  
Basics of Hydrologic Engineering  
Basics of Real Estate Transfers and Recording of Documents

Most of the other issues that I believe would confront someone serving in this subject area are typically handled in the general education and education through the District Judges Association.

Thank you

Betsy
